### ***Reasons for Allowance***

1. Claims 1-9 are allowed.
2. This is examiner's statement of reasons for allowance.

Regarding claims 1-9 the prior art, either singularly or in combination, does not teach an image reading device comprising: "a transparent cover for providing a linear image reading region that has a first length; an array of lenses that focuses light onto the light-receiving elements, the array of lenses having a second length that is greater than the first length; and a light-shielding member; wherein all of the light-receiving elements are arranged in a single line having a first extremity and a second extremity, the first extremity extending beyond the first length of the image reading region by a first amount, the second extremity extending beyond the first length of the image reading region by a second amount which is smaller than the first amount, the light-shielding member covering at least one light-receiving element disposed at the first extremity outside the first length of the linear reading region but inside the second length of the lens array."

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
